SINCE 1882

► **HARMON HINGE HT0812**

The HT0812 concealed Harmon hinge allows doors to swing clear of openings and be recessed into pockets perpendicular to the closed position of the doors. The jamb-side leaf is set back to allow a "concealed" installation, by adding 1/4" blocking over the mounting plates. Optional integrated detentes/catches are available for these hinges.

Although sized to match standard door thicknesses, custom sizes are also available.
