

► CUFF HT3617 - KNOB HT5302

From H. Theophile's unique line of door cuffs, the HT3617 is an engineered wrap-around design integrating backplates, handles, and lockset, and is available in a range of sizes and functions. Cuffs are made to order by project to suit door thicknesses, bevels, and finishes.

Shown here with a fixed HT5302 knob, the HT1027 thumbturn operates a deadbolt. The horizontal configuration of the HT3617 cuff can be combined with a variety of handles.

HEIGHT	WIDTH	THICKNESS
3"	6"	1-3/4"
