

► CUFF HT3680 - KNOB HT5300

From H. Theophile's unique line of door cuffs, the HT3680 is an engineered wrap-around design integrating backplates and lockset, and is available in a range of sizes. Cuffs are made to order by project to suit door thicknesses, bevels, and finishes.

Shown here with the HT5300 knob, the square configuration of the HT3680 cuff can be combined with a variety of handles.

CUFF L x W	KNOB
