

► **KNOB HT4186b - BACKPLATE HT3275bv**

Based on late 18th century patterns, the HT4186b illustrates the classical knob type with a central, raised boss and concentric rings of beading. H. Theophile's unique combination of machined and hand processes accurately reproduces the sculptural richness and robust detail of the original.

The HT3275bv rosette is period-appropriate with visible screws, but can also be specified with a concealed mounting backplate. See HT3275bv for additional backplate information.

KNOB	BACKPLATE	PROJECTION
2-1/4" diameter	2-7/16" diameter	2-9/16"
