

► **T-PULL HT5610 - BACKPLATE HT3001**

The HT5610, a minimal, cylindrical pipe T-pull with a centered shaft, utilizes the knurling of machine fittings for its detail, at once easy to grip and jewel-like in its precision. It can be used in vertical or horizontal orientations and as a dummy trim or with lock mechanisms.

See HT3001 for additional backplate information.

See HT5710 for a coordinating lever sizes.

| LEVER LENGTH | BACKPLATE | PROJECTION |
|----------------|-------------|------------|
| 3-1/2" overall | 2" diameter | 2-1/8" |
| 3-3/4" overall | 2" diameter | 2-1/8" |
