SINCE 1882

## ► CATCH HT7047

The HT7047 tension ball catch is used to hold light- to medium-weight dummy function swing doors in place when closed. Its tension can be adjusted by turning the screw on its side. The catch features a 4-way installation which allows the strike to engage from any side, allowing the catch to be installed either surface mounted or mortised flush. It is available in standard and custom finishes.
