

► **WIRE PULL HT9519**

The elongated HT9519 pull is based on an English handle circa 1930. Slender proportions and subtle curvature distinguish this fitting, while giving it a fine “hand” as well.

The piece is through-bolted from the back face of the door or drawer and is available in standard and custom sizes to suit various door and cabinetry applications. Its backplate can be proud or mortised flush to the door face.

See HT9509 for the edge-mounted version of this pull, and HT9513 for a similar pull.

LENGTH	WIDTH	PROJECTION
4"	13/16"	1-1/8"
8-1/2"	1-1/2"	1-3/16"
